## 2115-222 Block Upconverter, 21.35 - 22.35 GHz

The 2115-222 Block Upconverter converts 2.5 - 3.5 GHz to 21.35 - 22.35 GHz with a local oscillator at 18.85 GHz. Front panel LEDs provide indication of DC Power, External 10 MHz, and PLL Alarm. The RF In to RF Out gain is 0 dB. Connectors are SMA female for the RF Out and BNC female for the RF In and external reference input and reference output. A three-way switch controls which 10 MHz reference is being used. In the INT position, the internal reference is used, in the EXT position, the external reference is used, and in the AUTO position, the internal reference is used unless a +3 dBm  $\pm$  3 dB, 10MHz reference signal is connected to the external reference input. The 2115 is powered by a 100-240  $\pm$ 10% VAC power supply, and mounted in a 1 3/4" X 19 " X 14" rack mount chassis.
